Sines, Portugal

Profile

Computer Engineering graduate experienced in full-stack web development, dynamic interfaces, and relational database querying with PostgreSQL. Builds component-driven web applications using modern JavaScript and React, alongside modular backend services and Python automation scripts. Proficient with Docker, Git, and Linux workflows, with certified C2 English proficiency.

EXPERIENCE

Software Engineering Internship 02/2026 - 05/2026 · Vimioso Palace, Évora

CIDEHUS — Interdisciplinary Centre for History, Cultures and Societies (University of Évora)

PHP · AJAX · JavaScript (ES6+) · PostgreSQL · Python · Docker · Docker Compose · Git · JSON · Node.js

- Engineered automated ETL pipelines in Python and Node.js to parse and normalize unstructured historical texts, generating clean JSON datasets with embedded HTML tooltips and ingesting 170+ chapters into Directus CMS via REST API.
- Developed dynamic PHP and AJAX interfaces for 170+ chapters, parsing raw HTML via DOMDocument and XPath to reconstruct physical page layouts and render interactive footnote tooltips.
- Configured incremental Logstash ETL pipelines (JDBC) to synchronize PostgreSQL records into Elasticsearch, enabling sub-second full-text search and faceted filtering across historical corpora.
- Containerized local multi-service environments with Docker Compose and collaborated via Git in Agile sprints, conducting code reviews, pull requests, and structured debugging.

PROJECTS

Room Rent Full-Stack Web Platform

Java · Spring Boot · PostgreSQL · Spring Security · JPA

- Architected a full-stack MVC web platform in Java and Spring Boot to streamline student housing rentals across public, authenticated, and administrative roles.
- Implemented secure authentication and granular authorization using Spring Security, safeguarding private messaging channels and multi-tenant resource management.
- Modeled relational schemas in PostgreSQL using Spring Data JPA, designing optimized custom queries (@Query) for multi-criteria search filtering and responsive server-side rendering with Thymeleaf.

Advanced DSA & Algorithmic Solvers

Java · Dynamic Programming · Graphs · BFS/DFS

- Implemented network flow optimization algorithms, including Edmonds-Karp for maximum flow and min-cut analysis.
- Solved complex combinatorial problems using dynamic programming and graph traversals (BFS/DFS), analyzing asymptotic time and memory complexity.

EDUCATION

Bachelor's Degree, Computer Engineering - University of Évora 2023 - 2026

SKILLS

Programming Languages

Java · Python · JavaScript · PHP · SQL · Kotlin · C

Databases / Tools

PostgreSQL · Git · Docker · Docker Compose · Maven · Linux · Regular Expressions (Regex) · JSON · Node.js

Frontend / Backend

React · Spring · AJAX · HTML · CSS

Languages

English (C2 Certified) · Portuguese (Native) · Spanish (Beginner) · French (Beginner)
